

Heat Sealing Iron

HAN101

Used for applying adhesive backed edgebanding, this iron has a nonstick soleplate coating and a black lacquered hardwood handle that remains cool during use. Die cast aluminum soleplate heats up to 442°F and assures even heat distribution. A stand is supplied for storage while hot iron is idle. Operates on 120V.

Soleplate measures 1-3/4" wide x 4-1/2" long, handle is 5-3/4" long, cord length is 5-1/2' and overall length of iron is 11-1/2". Weighs 11 oz.

Replacement for Z0-523 (Pg 1121 MP Catalog).
