**Jowat PUR Edgebanding Glues and Cleaner  
for Automatic Edgebanders**

Jowat 608 gives a translucent bondline, broad spectrum of adhesion, high thermal stability and high initial strength, paired with reduced adhesive application for almost invisible joints.

In premium furniture manufacturing, demands on the adhesives have increased dramatically since laser technology and the so-called "zero bondline" were introduced. Moisture-curing PUR hot melts are used when high resistance to heat, water, steam, solvents or cleaners are required.

- World's first unfilled PUR granulate for edgebanding
- General purpose, for all standard edgebands: HPL, CPL, polyester, PVC, ABS, PP, resinated paper, solid wood, veneer
- High initial strength and quick downline processing
- Precise, stringing-free application
- Excellent thermal stability
- Low increase in viscosity at high temperatures

Edgebanding **PUR** Hot Melt

Code	Description	Ctn	List
60800-0010G	PUR <b>Granular (pellets)</b> Hot Melt, natural	9 cans/ box	\$ 506.63
60801-0010G	PUR <b>Granular (pellets)</b> Hot Melt, white	9 cans/ box	515.00
60800-0013HG	PUR Hot Melt <b>Cartridges</b> , natural	24/ box	776.12

Edgebanding **PUR** Cleaners / Flushing Agents

93094-0044G	Purging/Flushing agent for edgebanders after PUR hotmelt is used. <b>Granular</b> , red in color	44 lb. bag	\$ 806.00
93094-0012HG	Purging/Flushing agent for edgebanders after PUR hotmelt is used. <b>Cartridges</b> , red in color	25/ box	608.00
