Double Door Latch
Eliminate the Elbow Catch

Eliminates the need for an elbow catch or other devices, and allows hardware to be installed out of the way.

Each Kit includes one each: Latch, Activator, Catch and Instructions.

- Doors can be closed in any order
- Low profile latch mechanism reduces product footprint inside cabinet
- Requires use of a single lock (sold separately)
- Allows two or three point locking for standard or wardrobe style double door cabinets when used with a lock
- Easy to install and use
- Exceeds pull force above 150 lbs.
- Choose Black or White finish

How To Order

1. Determine location of the lock: Right or Left-Hand door
2. Decide where latch is needed: Top or Bottom-Mount
3. Choose your finish: Black or White

Lock Placement	Code	
	Top Mount	Bottom Mount
Right Door	200DL	300DL
Left Door	300DL	200DL

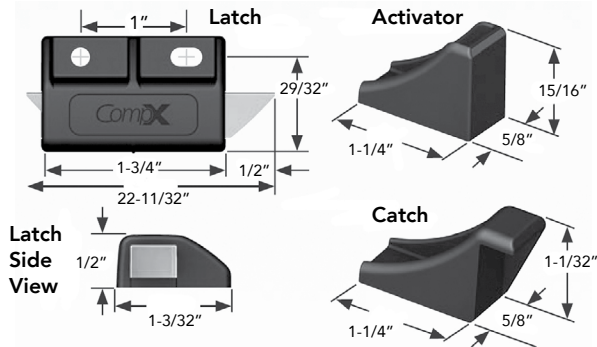

Install Example: DL200 with lock (sold separately) installed on right-hand door, top mount

The lock is mounted on the right hand door. Inside the right hand door, install the activator; on the non-locking door, install the catch.

Install latch inside the top of cabinet. The activator pushes the bolt on the latch to the other side to engage the catch. The bolt on the catch side is spring-loaded, allowing the doors to be closed in any order.

Turn the key to lock the other door; both doors are now secure. The locking door must be opened first to disengage the bolt in the latch – the bolt will slide back, allowing the non-locking door (with the catch) to open.

Specifications

Note: For cabinets taller than 48" it is recommended to use both top and bottom mount latches

Double Door Latch - 25 Kits/ Ctn.

Code	Finish	List/Kit
200DL-BL	Black	\$ 6.00
200DL-WH	White	6.00
300DL-BL	Black	6.00
