

Heat Gun

This Heat Gun is perfect for stripping paint, shrinking "shrink wrap", drying finish, drying waterbase contact cement, bending plastic, activating adhesives, repairing vinyl, soldering, drying, removing decals, softening white and yellow glue joints, and many other applications.

Includes a non-slip, rubber-backed base with 90-degree rotation to allow steady, hands-free aiming for many different applications. It reaches a high temperature of 1,000 degrees Fahrenheit and a high airflow rating of 23 CFM.

- High temp and power ratings: 1000°F/540°C at up to 1740 watts - for many industrial and commercial heating applications - ceramic element
- High air flow rating: 23 CFM at 3000 FPM gets the job done fast
- Air intake regulator allows variable temperature adjustment
- Mica insulated nozzle allows cool exterior temperature
- Powerful high speed universal motor
- Sturdy die cast aluminum housing
- Padded, adjustable stand can be positioned for any work angle - 90°
- Use to bend plastics, cure adhesives, dry parts, heat parts, shrink tubing and packaging, strip paint and more

Rating.....115V AC, 14.3 Amp
 Max. Temperature.....1,000
 Max. Air Volume.....23 C.F.M.
 Length.....12"
 Weight.....3.5 lbs.

Code	List/ea
HG-751B	\$ 249

3-wire grounded, UL listed, complies to OSHA.
